

AGUSTÍN DELGADO

Data Analyst · Business Intelligence · Applied AI & Automation

Buenos Aires, Argentina | +54 11 5052-1473 | augusto.delgado00@hotmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL PROFILE

Data Analyst with a focus on operational analytics, business intelligence and automation. I build KPI frameworks, dashboards and automated reporting pipelines using SQL, Python and Power BI, turning raw business data into decision-ready assets. My work spans healthcare operations, internal management systems and applied AI integration through hands-on projects.

PROFESSIONAL EXPERIENCE

Data Analyst & AI Solutions Developer — Healthcare Operations

Consultorio Barcala · Buenos Aires, Argentina

Mar 2022 – Present

- Designed and maintained operational dashboards and KPI reports for appointments, patient care, billing and internal workflows using SQL, Power BI, Excel and Python.
- Collaborated on the design and rollout of an in-house healthcare management system, translating operational requirements into functional and analytical specifications.
- Enhanced daily operational visibility through monitoring controls, reporting workflows and process analysis across multiple care areas.
- Automated recurring reports and administrative follow-up tasks, significantly reducing manual workload and accelerating access to actionable information.

PROJECTS

Paradigm — Healthcare Analytics & No-Show Risk Modeling

Python · SQL · SQLite · Power BI · Tableau · scikit-learn · Git/GitHub

- Built an end-to-end healthcare analytics case study on synthetic outpatient data: data generation, quality checks, SQL mart design, KPI validation and BI-ready exports.
- Developed a reproducible analytical workflow covering appointments, billing, cancellations, no-shows, operational efficiency and decision-support reporting.

Mi Consultorio — Medical Practice Management System

Python · Django · PostgreSQL · Bootstrap · SMTP · Render

- Developed a full management system for scheduling, administrative follow-up and centralized operational data.
- Built the transactional data layer enabling activity tracking, performance analysis and business reporting.

Paradise — Modular Analytics & Applied AI Ecosystem

TypeScript · React · Cloudflare · Python · SQL · Git/GitHub

- Designed analytics modules for KPI monitoring, trend comparison, alerting and operational metric interpretation within an AI-first modular architecture.

TECHNICAL SKILLS

Data & Analytics: SQL, Python, pandas, NumPy, data cleaning, ETL, descriptive and exploratory analysis.

BI & Visualization: Power BI, DAX, Power Query, Tableau, Looker, Advanced Excel, KPI design and monitoring.

Databases & Development: PostgreSQL, SQLite, Django, FastAPI, REST APIs, HTML/CSS, Git/GitHub.

AI & Automation: Machine learning fundamentals, scikit-learn, reporting automation, prompt engineering, Generative AI.

EDUCATION

Higher Technical Degree in Data Science & Artificial Intelligence

Exp. Dec 2028

Instituto Superior Santo Domingo, Buenos Aires

Data Analytics Program

Completed Aug 2025

CERTIFICATIONS & CONTINUOUS LEARNING

- IBM Generative AI Engineering Professional Certificate — Coursera (in progress)
- English for Career Development — University of Pennsylvania / Coursera (in progress)
- Relevant coursework: Data Analytics, Tableau, Storytelling with Data, Prompt Engineering, Power BI.

LANGUAGES

Spanish: Native. **English:** B2 Upper-Intermediate (EFSET). Strengthening professional communication in technical and business contexts.
